| **Subject:** | JIRA's project list | | |
| **Description:** | Hi,<br><br>How can I control the JIRA's project list displayed when creating a new ticket?<br>I configured the plugin to use a JIRA user which has access to only some of the JIRA projects, yet when I try to create a new JIRA issue I can see all JIRA projects from the drop down list.<br>Can this be controlled anywhere in the code?<br><br>We would like to move to production with this plugin so currently it's a show stopper.<br><br>Thanks,<br>K | | |
