Subject:	In case of longer Jira keys than 10 chars, modify issuekey.		
Description:	<p>Hi!</p> <p>When using Jira keys that are longer than 10 chars they get truncated in the database, which isn't correct.</p> <p>To work around this we modified the issuekey type in the database:</p> <pre>alter table swjiraissues modify issuekey varchar(30) not null;</pre> <p>However, this should be set in the Jira issue model source file (models/Issue/class.SWIFT_JiraIssue.php).</p> <p>Best regards, Pingdom Support</p>
