Updated:	20 Aug 2015	Due date:	
Subject:	More then one JIRA user		
Description:	Hi. In our company we have many JIRA uses that also use Kayako. I'd like to see JIRA username under staff settings so that you don't need to have one JIRA account from Kayako but every single staff that has their own JIRA account can add new issues (or use the general account if they dont have an account.
