Subject:	Tickets shown in SugarCRM are the same per contact		
Description:	Kayako module for SugarCRM v1.5 SugarCRM 6.5.18 Since adding the module it has made our instance unstable. Plus we see the same open tickets per contact, i.e i expect to see if I have one open ticket to only see that corresponding ticket, but we are seeing the first 50 open tickets whenever we look at a contact.

ok I re-implemented the module, and have found this error in the log files for Apache.

Missing argument 8 for SugarWebServiceImplv3::get_relationships() in
/data/sugar2-6.5.13/SugarCE-Full-6.5.13/service/v3/SugarWebServiceImplv3.php on line 556
